

Mobile control center UAV on the base of Volkswagen Crafter

Control post is intended for the complete functioning of UAVs offline. As part of the project the following systems were installed:

- air-conditioning;
- autonomous heating;
- fire fighting;
- autonomous combined power system (extra batteries, gasoline generator, inverters, uninterruptible power supply);
- mast system;
- CCTV system;
- system of video communication.

Control post provides autonomous deployment and operation of a 2-unmanned aerial vehicle of helicopter type, transmission and reception of video from UAV to the stationary communication point.
